Tech Stack:

Languages: JavaScript, TypeScript, SQL

Frontend:

Frameworks: React

State Management: Redux, Context API

Styling: CSS Modules, Sass

Testing: Jest, React Testing Library

Deployment: Vercel

Backend:

Runtime: Node.js

Frameworks: Express

Databases: PostgreSQL, MongoDB

Testing: Jest

Dev Tools:

Version Control: Git

Documentation: Docusaurus

APIs: Bruno, Postman

Build Tools: Vite, Railway

Domino's Pizza Clone - Full-Stack Web App

- Fully functional pizza delivery app featuring token-based authentication, Google OAuth2.0, JWT communication, real-time order tracking, Stripe payments, and Leaflet map integration for address selection.
- Built with Vite, React, TypeScript, Node.js, and Express.js.
- Used MongoDB for the database and Zod for validation.
- Implemented third-party packages including axios, bootstrap, react-google-recaptcha-v3, swiper, mapbox-sdk, react-autosuggest, bcrypt, cookie-parser, cors, multer, nodemailer, and more.

Mindcraft Fitness – Full-Stack Web App

- Fitness web application with a built-in store and a user portal for adding workouts.
- Built with Vite, React, Node.js, and Express.js. Used MongoDB for data storage and implemented JWT authentication.
- Frontend packages include axios, bootstrap, dotenv, react-calendar, and sass.
- Backend packages include bcrypt, cors, dotenv, jsonwebtoken, mongoose, and validator.

Nature in Bulgaria – Web App

- Simple HTML, CSS and JavaScript website, showcasing the nature in Bulgaria.
